PROFESSIONAL SUMMARY

Business Analyst with 2+ years of experience in **Operations Analytics, financial reconciliation, and KPI dashboarding**. Highly proficient in **SQL, Power BI (DAX, Power Query), Python (Pandas), and Advanced Excel**, with a proven track record analyzing high-volume transactional and collections datasets to optimize operational efficiency. Experienced in tracking lending/settlement metrics, evaluating workflow experiments, eliminating process bottlenecks by 60%, and translating complex data trends into actionable strategic recommendations for executive leadership.

TECHNICAL SKILLS

Analytics & BI Tools: Power BI (Advanced DAX, Power Query, Data Modeling), Tableau, KPI Scorecards, Executive Reporting, Advanced Excel (Pivot Tables, XLOOKUP)

Databases & Querying: SQL (Complex Queries, Window Functions, CTEs, Aggregations, Joins), SQL Server, MySQL, SSMS, Query Optimization

Programming & Quantitative Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), PySpark, Statistical Analysis, EDA, A/B Testing & Experimentation

Operations & FinTech Analytics: Collections Health Tracking, Payment Reconciliation, AP/AR Aging, Operational Efficiency, Discrepancy Analysis

Business Systems & ERP: Workday ERP, CargoWise, Financial Control Audits, Interface Error Troubleshooting, Moveworks Analytics

Data Engineering & Platforms: ETL Pipelines, Automated Data Ingestion, Databricks, Delta Lake, Git, UAT Workflow Validation

EXPERIENCE

OIA Global | *Associate Analyst – Finance & IT* **Jul 2025 – Present**

- Built and maintained comprehensive **Power BI operational dashboards** with advanced **DAX** measures and **Power Query** to monitor key business metrics, collections health, and executive financial performance.
- Analyzed high-volume **settlement, AP/AR, and payment records** across **Workday ERP** and **CargoWise**, identifying transactional bottlenecks, payment aging trends, and operational inefficiencies.
- Engineered automated **Python and SQL data pipelines** for discrepancy detection and reconciliation, reducing manual reporting and data-entry effort by **60%** while ensuring data accuracy.
- Leveraged **PySpark and Databricks** for large-scale transactional data aggregation, partnering with senior operational leaders to deliver data-backed recommendations that improved operational turnaround time.

PROJECTS

Discrepancy Data Automation & Operational Reporting | *Python, SQL, Power BI* **OIA Global**

- Designed and implemented an automated data ingestion framework in **Python and SQL** to consolidate and normalize disparate legacy operational discrepancy spreadsheets into a centralized data model.
- Developed interactive **Power BI reports** with automated anomaly detection, enabling operational managers to identify root causes and resolve settlement discrepancies **60% faster**.

Enterprise AI Chatbot Analytics & Workflow Optimization | *Moveworks Analytics, Power BI, Excel* **OIA Global**

- Tracked user interaction trends, adoption rates, containment metrics, and **CSAT scores** across enterprise automation workflows, evaluating workflow experiments to maximize user satisfaction.
- Conducted root-cause analysis on user drop-offs and unresolved intents; partnered with product stakeholders on knowledge-base optimization to measurably enhance self-service resolution.

Employee Performance Analysis & KPI Dashboard | *Power BI, DAX, Power Query, SQL, Excel* **Feb 2025**

- Preprocessed multi-dimensional performance datasets and constructed **interactive Power BI dashboards** with **DAX** and drill-through reports to visualize operational productivity, SLA adherence, and team trends.

EDUCATION

Matoshri College of Engineering, Nashik **2020 – 2024**
Bachelor of Engineering – Information Technology *CGPA: 7.74 / 10*

Karmaveer Bhaurao Patil Junior College, Vinchur **2020**
Higher Secondary Certificate (HSC) – Science *70.31%*

Maharashtra State Board **2018**
Secondary School Certificate (SSC) *82.60%*
